

MGE Capabilities Statement

Marvin Groves Electric Co., Inc. is a General Contracting (GC) and Electrical contracting firm that is a Texas corporation and has been in business for 38 years. In 2007, we were selected as the SBA Jeffery Butland, Family Small Business Firm of the Year (construction). We specialize in construction for Federal, State, and local governments

Construction capabilities include:

Ground up construction, Altus AFB Composite building to make specialized repairs with special materials, Metal warehouse storage facilities, complete interior remodel and repairs for Hospital, clinics, office space, teaching areas, class rooms, welding and manufacturing labs.

Electrical construction: voltages ranges from 24V DC, 4/20 signal, 12 VAC, 120/240, 120/208, 277/480, 4160 V, 15 Kv cable installation and terminations to equipment, Security and camera systems, Fire Alarm, Controls for equipment, and energy management systems. Lighting retrofit and energy reduction items such as motion sensors

We have worked at Pantex, Sheppard AFB munitions area for electrical and security, Cannon AFB for grounding system and lightning protection for munitions storage area.

At this time, we have approximately \$2M of contracts, either under construction or recently completed. We have experience in performing under a variety of different contract types, including IDIQ and POCA.

We have approximately 12 employees, many of whom are willing to travel as far as necessary to complete a job.

MGE uses Maxwell Systems American Contractor software to run the business and give up-to-date job reports. For scheduling purposes, we use Primavera Contractor to keep the projects on time. We have in-house capability to perform small CAD jobs using AutoCAD, while using local A/E firms to perform larger jobs.

We have completed several Design-Build projects for Federal government entities and have a good working relationship with several different A/E firms. These firms are anywhere between an ENR top-10 rated firm (PBS&J) to a local architectural firm (Secord & Lebow Architects) to a local engineering firm (Biggs & Matthews).

MGE has a bonding capability of \$7.5M per project, with an aggregate of \$18M; higher amounts are possible if requested.

Letters of recommendation are available on request.
